

OpcAddCommentCallback Delegate

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

Represents the method that will apply the **comment** to the state of a condition node.

C#

```
public delegate OpcStatusCode OpcAddCommentCallback(OpcNodeContext<OpcConditionNode>  
context, byte[] eventId, OpcText comment);
```

Parameters

context [OpcNodeContext<OpcConditionNode>](#)

The [OpcNodeContext](#) to use to apply the comment.

eventId [Byte\[\]](#)

The identifier identifying a particular event notification where a state was reported for a condition.

comment [OpcText](#)

A localized text to be applied to the condition.

Returns

[OpcStatusCode](#)

The [OpcStatusCode](#) which defines the outcome of the operation.
