

OpcCertificateImpeachment Enum

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

Defines the possible kind of impeachment a certificate can be confronted with after it was initially trusted.

C#

```
public enum OpcCertificateImpeachment
```

Inheritance [Object](#) > [ValueType](#) > [Enum](#) > OpcCertificateImpeachment

Fields

Name	Value	Description
None	0	There is no impeachment associated with a certificate.
Changed	1	The initially offered certificate was trusted while the subsequent supplied certificate is a different one.
