

OpcFileSetPositionMethodNode.FileSetPositionCallback Delegate

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

SetPosition is used to set the current position of the file handle.

C#

```
[CLSCompliant(false)]
public delegate void FileSetPositionCallback([OpcArgument("FileHandle", Description = "The
file handle associated with the file its position is to be updated.")] uint fileHandle,
[OpcArgument("Position", Description = "The new position within the file.")] ulong
position);
```

Attributes [CLSCompliantAttribute](#)

Parameters

fileHandle [UInt32](#)

A file handle indicating the access request and thus indirectly the position inside the file.

position [UInt64](#)

The position to be set for the file handle in the file. If a Read or Write is called it starts at that position. If the position is higher than the file size the position is set to the end of the file.
