OpcReadNodeHistoryProcessedDetails Members

Namespace: Opc.UaFx
Assemblies: Opc.UaFx.Advanced.dll, Opc.UaFx.Advanced.dll
The OpcReadNodeHistoryProcessedDetails type exposes the following members.

Constructors

OpcReadNodeHistoryProcessedDetails(DateTime, DateTime, IEnumerable<OpcNodeId>)

C#

```
public OpcReadNodeHistoryProcessedDetails(DateTime startTime, DateTime endTime,
IEnumerable<OpcNodeId> aggregateTypes)
```

Parameters

`startTime` DateTime

`endTime` DateTime

`aggregateTypes` IEnumerable<OpcNodeId>

Exceptions

ArgumentException

The `startTime` or `endTime` is equals MinValue.

ArgumentNullException

OpcReadNodeHistoryProcessedDetails(DateTime, DateTime, OpcNodeId[])

C#

```
public OpcReadNodeHistoryProcessedDetails(DateTime startTime, DateTime endTime, params
OpcNodeId[] aggregateTypes)
```

Parameters

`startTime` DateTime

`endTime` DateTime

`aggregateTypes` OpcNodeId[]

Exceptions

ArgumentException

The `startTime` or `endTime` is equals MinValue.

Properties

AggregateConfiguration

C#

```
public OpcAggregateConfiguration AggregateConfiguration { get; }
```

Property Value

OpcAggregateConfiguration

AggregateInterval

C#

```
public double AggregateInterval { get; set; }
```

Property Value

Double

AggregateTypes

C#

```
public OpcNodeIdCollection AggregateTypes { get; }
```

Property Value

OpcNodeIdCollection

EndTime

C#

```
public DateTime EndTime { get; set; }
```

Property Value

DateTime

Exceptions

ArgumentException

The `value` is equals MinValue.

StartTime

C#

```
public DateTime StartTime { get; set; }
```

Property Value

DateTime

Exceptions

ArgumentException

The `value` is equals MinValue.
