

OpcTypeDecodingFailedEventHandler Delegate

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

Represents the method that will handle events which occur when the decoding of a specific type has failed.

C#

```
public delegate void OpcTypeDecodingFailedEventHandler(object sender,
OpcTypeDecodingFailedEventArgs e);
```

Parameters

sender [Object](#)

The source of the event.

e [OpcTypeDecodingFailedEventArgs](#)

An instance of the [OpcTypeDecodingFailedEventArgs](#) class containing the information used to decode a specific [Type](#).
