

IOpcService<TResponse, TRequest> Members

Namespace: Opc.UaFx.Services

Assemblies: Opc.UaFx.Advanced.dll, Opc.UaFx.Advanced.dll

The [IOpcService<e, t>](#) interface defines the following members.

Methods

Invoke(TRequest)

Executes the service using the specified [request](#) data.

C#

```
TResponse Invoke(TRequest request)
```

Parameters

[request](#) **t**

The [TRequest](#) data to use to execute the service.

Returns

[e](#)

The [TResponse](#) of the service after processing the [request](#).

Exceptions

[ArgumentNullException](#)

The [request](#) data is a null reference (Nothing in Visual Basic).

[InvalidOperationException](#)

The requested operation is currently not supported, especially using the [request](#) information specified.

[OpcException](#)

The service execution failed upon different circumstances; for more details see exception details.
