

# OpcReadNodesHistoryRequest Class

**Namespace:** Opc.UaFx.Services

**Assemblies:** Opc.UaFx.Advanced.dll

**C#**

```
[CLSCompliant(false)]  
public class OpcReadNodesHistoryRequest : OpcServiceRequest<HistoryReadValueId,  
HistoryReadValueIdCollection>, IOpcServiceRequest
```

**Inheritance** [Object](#) > [OpcServiceRequest](#) > [OpcServiceRequest<HistoryReadValueId, HistoryReadValueIdCollection>](#) > [OpcReadNodesHistoryRequest](#)

**Attributes** [CLSCompliantAttribute](#)

**Implements** [IOpcServiceRequest](#)

## Constructors

| Name                                                                                                            | Description |
|-----------------------------------------------------------------------------------------------------------------|-------------|
| <a href="#">OpcReadNodesHistoryRequest(IOpcServiceRequestHeader, OpcReadHistoryDetails, HistoryReadValueId)</a> |             |
| <a href="#">OpcReadNodesHistoryRequest(IOpcServiceRequestHeader, OpcReadHistoryDetails, IEnumerable)</a>        |             |
| <a href="#">OpcReadNodesHistoryRequest(OpcReadHistoryDetails, HistoryReadValueId)</a>                           |             |
| <a href="#">OpcReadNodesHistoryRequest(OpcReadHistoryDetails, IEnumerable)</a>                                  |             |

## Properties

| Name                                      | Description                                                                                                            |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <a href="#">Details</a>                   |                                                                                                                        |
| <a href="#">Header</a>                    | (Inherited from <a href="#">OpcServiceRequest</a> )                                                                    |
| <a href="#">ReleaseContinuationPoints</a> |                                                                                                                        |
| <a href="#">TimestampsToReturn</a>        | Gets or sets a value which specifies the timestamps to be returned for each requested <a href="#">Value</a> attribute. |

## Methods

| Name                             | Description                                         |
|----------------------------------|-----------------------------------------------------|
| <a href="#">CreateHeader</a>     | (Inherited from <a href="#">OpcServiceRequest</a> ) |
| <a href="#">CreateHeaderCore</a> | (Inherited from <a href="#">OpcServiceRequest</a> ) |
