

IPlcSymbol Interface

Namespace: IPS7Lnk.Advanced

Assemblies: IPS7LnkNet.Advanced.dll

Represents a single symbol that can be used to access PLC data just using a simple name.

C#

```
public interface IPlcSymbol : IPlcEntity
```

Implements [IPlcEntity](#)

Properties

Name	Description
Description	Gets or sets more meaningful information about the symbol and its usage than only using the Name property.
Name	Gets the name of the symbol through that PLC data can be accessed.
Type	Gets the PLC type information associated with the entity. (Inherited from IPlcEntity)
