

PlcUInt64ArrayType Members

Namespace: IPS7Lnk.Advanced

Assemblies: IPS7LnkNet.Advanced.dll, IPS7LnkNet.Advanced.dll

The [PlcUInt64ArrayType](#) type exposes the following members.

Properties

DefaultValue

Gets the type dependent default value which can be assigned to an entity of the type represented.

C#

```
public override object DefaultValue { get; }
```

Property Value

[Object](#)

The type dependent default value.

Methods

CreateEntity()

Creates a new [IPlcEntity](#) object which represents a concrete accessible entity of this [PlcType](#).

C#

```
public override IPlcEntity CreateEntity()
```

Returns

[IPlcEntity](#)

An instance implementing the [IPlcEntity](#) interface its [Type](#) property does refer to this [PlcType](#).

Exceptions

[NotSupportedException](#)

This pure [PlcType](#) instance can't create an entity, because it is an abstract type representation.

Of(Int32)

Retrieves the according [PlcUInt64ArrayType](#) which matches the supplied type metadata.

C#

```
public static PlcUInt64ArrayType Of(int length)
```

Parameters

`length` Int32

The maximum length used to store a [PlcUInt64ArrayType](#) value.

Returns

[PlcUInt64ArrayType](#)

The [PlcUInt64ArrayType](#) which matches with the characteristics supplied.

Exceptions

[ArgumentOutOfRangeException](#)

The `length` is out of the bounds defined by `MinLength` and `MaxLength`.

Of(PlcIdentity, Int32)

Retrieves the according [PlcUInt64ArrayType](#) which matches the supplied type metadata.

C#

```
public static PlcUInt64ArrayType Of(PlcIdentity identity, int length)
```

Parameters

`identity` [PlcIdentity](#)

The [PlcIdentity](#) to which the [PlcUInt64ArrayType](#) does refer.

`length` Int32

The maximum length used to store a [PlcUInt64ArrayType](#) value.

Returns

[PlcUInt64ArrayType](#)

The [PlcUInt64ArrayType](#) which matches with the characteristics supplied.

Exceptions

ArgumentException

The `identity` does not provide the necessary information required to address the type of data.

ArgumentNullException

The `identity` is a null reference (Nothing in Visual Basic).

ArgumentOutOfRangeException

The `length` is out of the bounds defined by `MinLength` and `MaxLength`.

Of(PlcIdentity, PlcName, Int32)

Retrieves the according `PlcUInt64ArrayType` which matches the supplied type metadata.

C#

```
public static PlcUInt64ArrayType Of(PlcIdentity identity, PlcName name, int length)
```

Parameters

identity PlcIdentity

The `PlcIdentity` to which the `PlcUInt64ArrayType` does refer.

name PlcName

The `PlcName` of the `PlcType`.

length Int32

The maximum length used to store a `PlcUInt64ArrayType` value.

Returns

PlcUInt64ArrayType

The `PlcUInt64ArrayType` which matches with the characteristics supplied.

Exceptions

ArgumentException

The `identity` does not provide the necessary information required to address the type of data.

ArgumentNullException

The `identity` or `name` is a null reference (Nothing in Visual Basic).

ArgumentOutOfRangeException

The `length` is out of the bounds defined by `MinLength` and `MaxLength`.
